

Exclusivity in Hungarian Focus Constructions: A Visual-World Paradigm Study

Gábor PARTI, Yu-Yin HSU¹

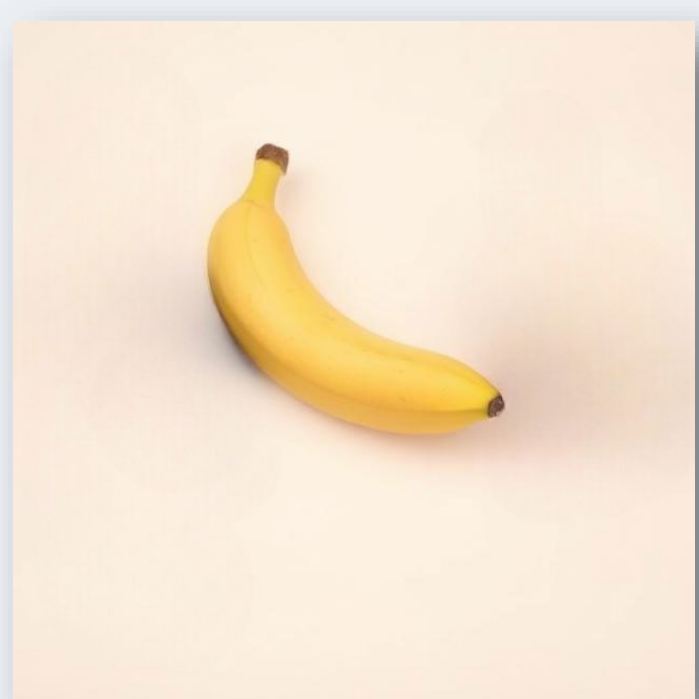

¹The Hong Kong Polytechnic University

Introduction

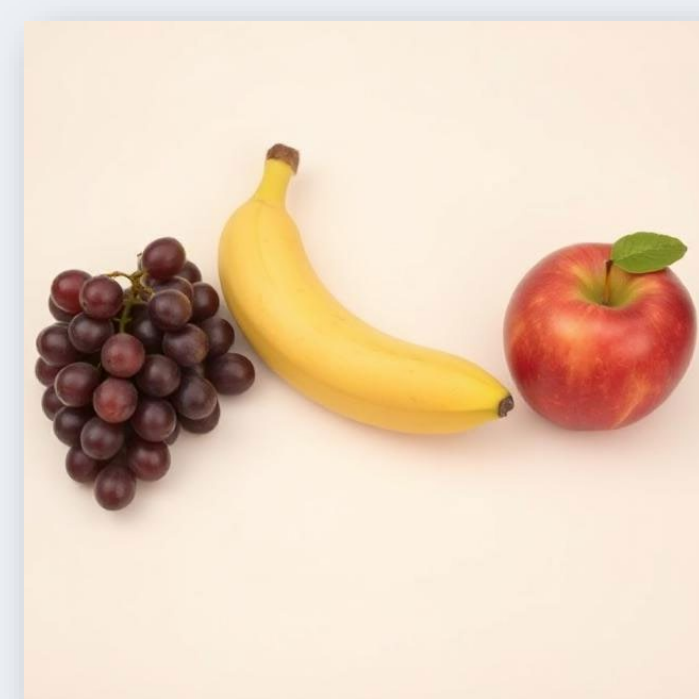

- Hungarian sentences use a pre-verbal focus (PVF) position; debate if it entails exhaustivity.

- 1) Anna **egy banánt** evett.
Anna **a banana-ACC** eat-PST-3SG
It is a banana that Anna ate.
- 2) Anna **csak** egy banánt evett.
Anna ate **only** a banana.
- 3) Anna **többek között** egy banánt evett.
Anna ate, **among other** things, a banana.

- RQ: Is the pre-verbal focus exhaustive?

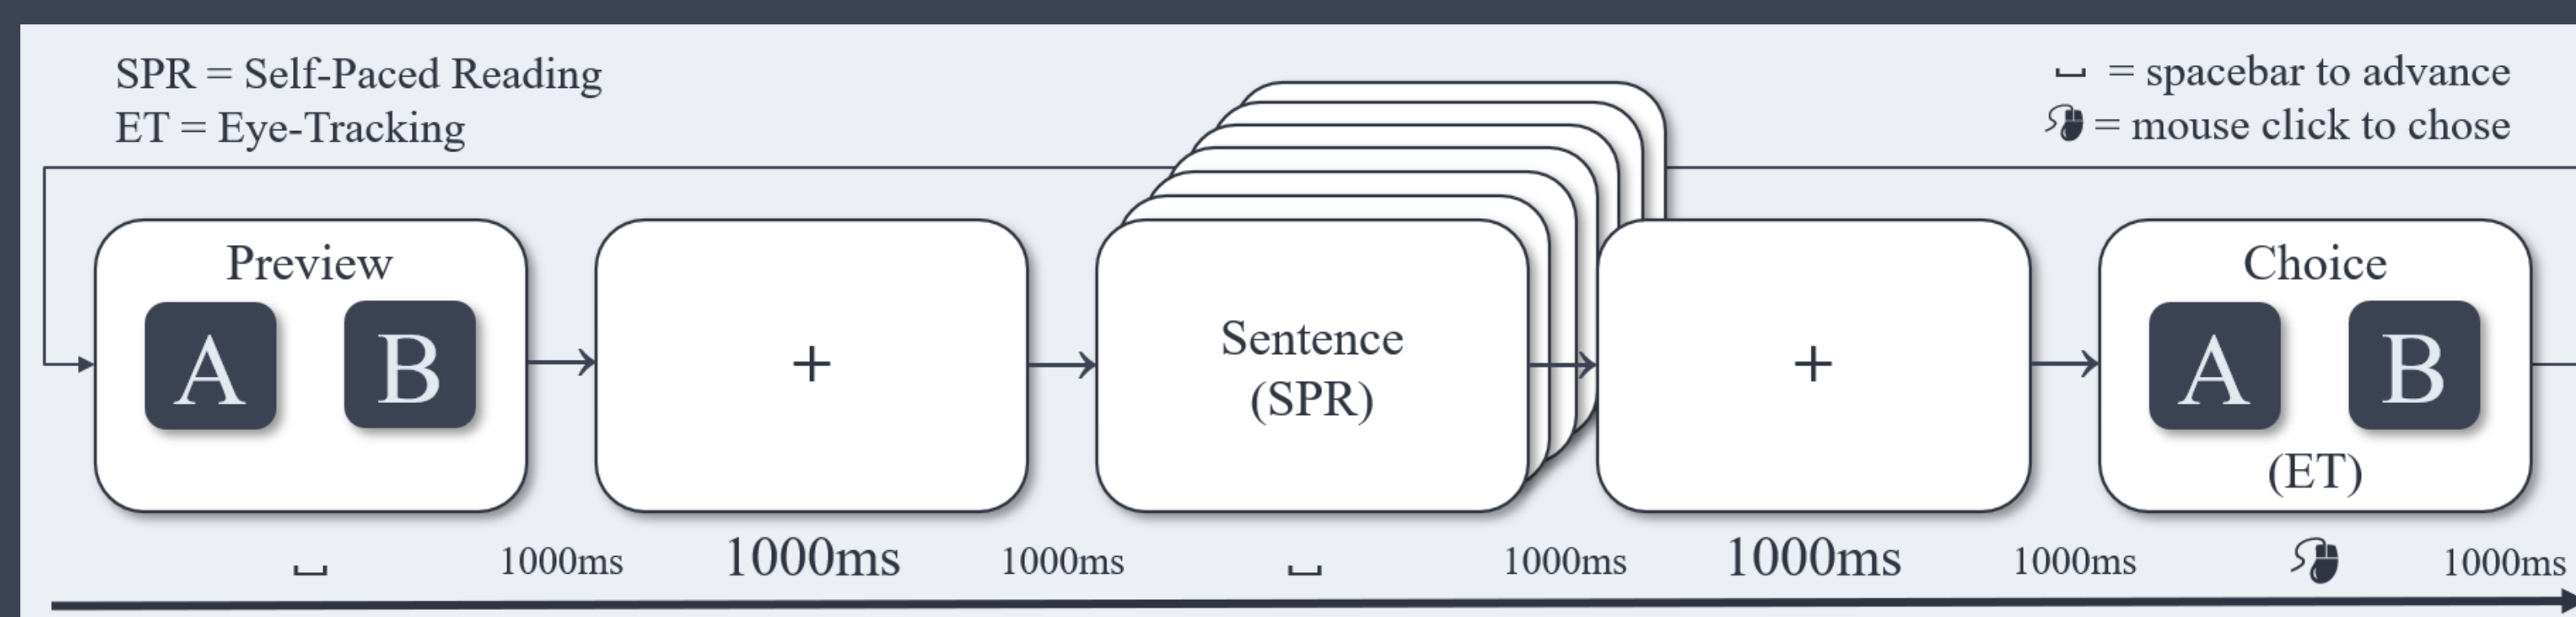

?

Experiment

- Sentence-Picture Verification with Self-Paced Reading and Eye-Tracking
 - 54 PVF sentences (18 items × 3 conditions)
 - 3 Conditions:
 - Unmodified** PVF focus (ex.1)
 - Exhaustive** focus w/ *csak* 'only' (ex.2)
 - Contrastive** focus w/ *többek között* 'among others' (ex.3)
 - 55 participants (32 female; mean age = 35)
 - 24 interactions per participant per stimuli
